

# WHY ARE THERE MORE SECTIONS THAN I TEACH?

Moodle automatically creates a “**combined section**” (CS), which appears to be something like: “section 1/2”. It includes all the students from sections 1 and 2 for easy course management.

To **disable** either a section or the CS:

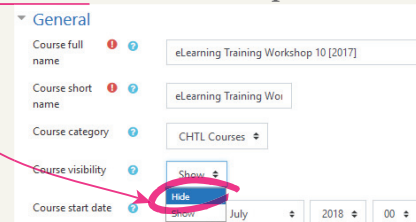

1

Go to your course page, and then click on “**Edit Settings**” in the “**Actions**” button.

2

Scroll down to find “**General**” and choose “Show/Hide” under “**Visible**” from the dropdown menu.

3

Press the “**Save and display**” button when done.

Save and display

4

When you log in next time, the course will appear in gray colour, which means that only the teachers, but not the students, are able to see that course in Moodle.
